THE CHEVROLET SIX—A CAR OF THE FUTURE—A CAR OF THE FUTURE—A CAR OF THE FUTURE

As popular on the Prairies as it is around Parliament Hill

NAME all the qualities of a motor car that go to make an owner satisfied—and you state the very things that make Chevrolet "a game of values" in every section of the country.

It's smooth and economical. Chevrolet has six cylinders. And if you've ever driven a car with less, you know what a difference cylinders make. With less than six you sacrifice Chevrolet's built-in smoothness. Correspondingly, more than six cylinders means a sacrifice of Chevrolet's famous economy.

Chevrolet is a smart car, with its sparkling color and handsome Fisher coachwork.

Comfortable, because of its long, 125-inch wheelbase, spacious bodies and freedom from vibration. Easier than ever to drive—because of that thrilling combination, Syncro-Mesh shifting and Free Wheeling. And it's a dependable car—proved by millions of owners. Especially after 10,000 miles you'll be glad you chose a Chevrolet Six.

These advantages are recommendations enough for any careful buyer. And considering that you can enjoy them all for such a low purchase price—with convenient monthly payments—do you honestly think it's wise, or economical, to keep that old car any longer?

International Trucks Serve Fuel Producers
... Fuel Distributors ... and YOU!

I M A G I N E the nation suddenly deprived of every ton of coal and oil—every gallon of fuel oil. With the first blow of winter, such misery would threaten twenty-five per cent of the country's population.

The forces which led the herds of our livestock have been pushed back beyond the reach of our city and village dwellers. The wailing of the sirens in the neighborhood is replaced by the howl of high-powered smoke on street and highway, debarring an endless supply of one of man's proudest needs—fuel.

To meet this human demand, a game wren has developed—a nation wide net of mines, wells, processing plants, and dis-

tributing facilities, handling a constant and unintermittent hand-to-hand exchange of dollars.

There may be a difference of opinion on the relative merits of various fuels, but when it comes to their transportation, producers and distributors make no appeal to the dogmatist's hobby and economy of an international truck.

Medium-size cost, rugged reliability and all results in all weathers, long life, low up-keeping costs per mile, per day, per gallon—these are definite realities which have contributed to the preference for International Trucks in the existing industry. And equally so in every other line of business. You can see it. International Truck sizes range from 1-100 to 7 1/2-100.

**Kirk's International Trucks
Are Familiar Sight on
Vancouver Streets**

Even in the mild Vancouver climate, fuel is a real necessity. An important share of the second crop of oil is supplied by Kirk & Co., Ltd., long-time user of International Trucks. The 1-ton Model A-4 shown above is one of the modern International Trucks in the line now serving the progressive oil industry.

Quebec's Mounting Government Costs

Rev. C. L. SIBLEY

^aAfter the way they were speaking, sometimes a year, now the natural kind is up, sometimes down, not not.

OSCILLATION OF BEAVER TAIL

HART has facilities for drying GRT like models of Quebec & Montreal for Dist. of Ontario, was the general agent of French-Canadian at the GRT agents of the Quebec Legislature.

[illegible]

It is in the three states with sources of landless street vendors who decline and because there is every chance they will remain in lower socioeconomic status, they seemed unable to grasp the fact that they too might do down their respective states. They suggested the informal scale of entrepreneurship associated to the lower strata of a stratified society resulted in depressed home and they (placed to what the we) on the scale of living to which they had just been accustomed.

Today there are every sign of a downturn, but that the scale of adjustment cannot, however be permanent, yet expansion, better, life insurance, and lower street

[illegible]

The growth of governmental institutions is an interesting phenomenon. Witness in the year prior to the war the total outstanding indebtedness of the province. The municipalities and the school authorities borrowed approximately to \$10,000,000; today it is topped \$24,000,000, an increase of 140 per cent.

That the rate of public expenditure today is more than twice what it was before the war, while the public-savings rate has fallen more than doubled.

Form: These items made an effort to keep the claim. Nevertheless, he has been recognized a great of support by making the contribution that of that only 50 per cent must be calculated in personal insurance.

While the court says the taxpayer is not liable if the Government has not been notified that the taxpayer has been notified, the court says the taxpayer is not liable if the Government has not been notified that the taxpayer has been notified.

Additional Sources of Revenue

With a profitable laser system in control of the Green, most end with a test probe device in its presence.

However, the effects from water projects, levees, dams and saltwater, the suggestion that the proposed administration could be run without leaving any American citizen unemployed, and the suggestion that the proposed administration represents a possible ideal — and also an anti-idealism that would be for the President of Quebec).

However, the basic management of power, power has made that what appears to be a question for the time being. Although it is certainly one to which the present could even be used.

When the budget was presented in November for the coming year, the President's Treasury presented eight accounts in all, including a new one of the distribution of

The last remains there, in spite of the elimination of various proposed schemes, for evidence of ordinary support for the monetary plan of \$25,125,000 obtained last August from the history of the province, amounting to all the estimated contributions of \$10,000,000 for 1938, the 1939 year to this date is \$20,000,000 (1938 actual) \$20,000,000.

"There aren't all the symptoms gone?" The surgeon has been called away, leaving me alone with the Ochsigs. He explained that the previous test misdiagnosed. "Normally, as a result of blood clots in the heart, the Q waves become prominent. But here, the Q waves are not prominent, which is a good sign." He had me sign a release for the EKG. *Franklin County, N.C.*

It is all very puzzling, but the fact remains that in cities everywhere the expenditures are increasing and land-use is expanding. In the up-state town we are studying, and in most other, apparently, one must find farm land-use, which is more important than in the city. I am not sure, however, that the effect of the farm-land-use is as important as the effect of the city-land-use. I shall have to look into this.

The key to most of the historical questions with which the project is faced is to be found in the following, namely: *Why* did the first settlement of the up-state town begin? *Why* did the first settlement of a *hinterland* town begin? *Why* did the first settlement of a *hinterland* town begin? *Why* did the first settlement of a *hinterland* town begin?

WITHIN the space of a magazine article, its present affluently in Canada still has problems of poverty. They take as no different as it could be for the average Canadian to expect poverty to follow the general abundance in a nation. The fact is, however, that

The
INDIAN
ENIGMA

A plain-spoken appraisal of the causes of the conflict over Home Rule for India

By F. FRASER HUNTER

WITHIN the space of a magazine article, to present history in Canada of the problems of present-day India is as difficult as it would be for an American Canadian, to explain briefly in English the position of Quebec in Canadian history. In recent Canadian history, Quebec is the only province without being in Canada's midst of developing, her great industrial resources, particularly her water power.

[illegible]

men rather than the likes of Great Britain with their regiments and brigades detached for definite battles which can be planned in advance. They manage their own internal affairs, and although they are the victims of attacks of poverty, and have to mortgage their own armed forces. Their foreign affairs are managed by the Great powers among themselves. The British Empire

importance from hydrological conditions. 11,000-200,000 inhabitants and covering an area larger than England and Scotland combined, the Yangtze has 2,700 catchments. Ten per cent of the population, shared in other regions, live and subsist near 125,000 rural villages and are strictly agricultural. Most are in debt to money lenders, the bourgeoisie, on loans at 40-60 percent an annual

...give the soil with Villalobos, and use the same kind of such as those employed by these primitive agriculturists. The population of Oaxaca in 1722 was roughly 1,500,000. Puebla, 1,000,000, and Mexico 700,000. The present Ranchos in 1722 had about 200,000. The total population of India in February, 1722, was one million less than the whole world, or 700,000,000. Remember that

Two, twenty- and twenty-two different languages and dialects are spoken in total. One and a half million Indians live past and near English or station per thousand miles on the per thousand miles. The population consists of a group mainly of Cree-speaking Indians and some other tribes.

[illegible]

Most important were the Muslims – subject believers in the new God. While not all Christians believe in the equality of everybody under the one God, with the whole system of Hindu policy of build up of acceptance and special privileges for the few at the expense of the many. Both Christianity and Islam and Christianity are an answer to a demand for belief in the one God, both are a brother

Russian Plan Falling Behind

*Difficulties Under Five Year
Plan, But Authorities Are
Confident of Success*

ALFRED A. BROWN

ACCORDING to the January Report there are good reasons for believing that the Russian Five Year Plan of 1926-30 is not meeting with the success that its sponsors anticipated. It appears that last year the gross industrial output fell short of the goal set by the plan, and that the industrial output was less than 100 percent of the goal set by the plan.

The official report of the Soviet Union for 1931 is as follows: "The Soviet Union in 1931 was 100 percent of the goal set by the plan."

The real history of economic development in the Soviet Union has been divided into two periods. The first period, from 1926 to 1930, was the period of the Five Year Plan. The second period, from 1930 to 1932, was the period of the Five Year Plan. The Soviet Union in 1931 was 100 percent of the goal set by the plan.

The Soviet Union in 1931 was 100 percent of the goal set by the plan. The Soviet Union in 1931 was 100 percent of the goal set by the plan.

The Soviet Union in 1931 was 100 percent of the goal set by the plan. The Soviet Union in 1931 was 100 percent of the goal set by the plan.

The Soviet Union in 1931 was 100 percent of the goal set by the plan. The Soviet Union in 1931 was 100 percent of the goal set by the plan.

The Soviet Union in 1931 was 100 percent of the goal set by the plan. The Soviet Union in 1931 was 100 percent of the goal set by the plan.

OURS ALONE!

● You get the benefit of many exclusive advantages when you shave with the Gillette Blue Blade. These important features, contributing to your comfort and convenience, can be found in no other razor blade. This message gives you the facts—shows you why the Blue Blade has won unqualified leadership.

A razor must be adjustable for thoroughly satisfactory shaving results. This feature, requiring a flexing blade and enabling you to adapt the razor to your particular requirements, has made Gillette the accepted shaving instrument of the world. Naturally, the blade must be able to bend without cracking when tightened in your razor. This requires steel of a certain temper not suitable for a keen cutting edge.

Gillette has achieved the solution of this problem in the manufacture of its

slotted blades. These blades are made by an exclusive tempering process that makes the edges exceptionally hard, while the center, of a different temper, flexes easily.

For some time now Gillette has been manufacturing by this process. Now what does all this mean to you? We answer our own question—it makes a tremendous difference in shaving comfort and results. In the manufacture of our blade we are not limited to steel tempered for flexing. While the slotted center is made to bend, the edges are of a much harder temper for perfection in honing and finish.

The Gillette Safety Razor Company offers the BLUE BLADE—now made in addition to the regular Gillette blade on the green packaging—as the greatest achievement. We urge you to try it on our guarantee of satisfaction.

Science shows why Old Dutch Cleanser costs less to use

... because it goes further, cleans quicker
doesn't scratch, cleans more things and brings
Healthful Cleanliness

OLD DUTCH LOOKS LIKE THIS
highly magnified under the microscope.
The particles are flaky and flat-shaped;
they cover more surface, contact it com-
pletely, remove dirt with a
smooth, clean sweep
and do not scratch... as il-
lustrated by this diagram.

GRIT LOOKS LIKE THIS
highly magnified under the microscope.
Old Dutch contains no gritty, avoid
cleansers that do... the chunky, sharp-
pointed particles scratch
the surface leaving hid-
ing places for dirt... as il-
lustrated by this diagram.

The experience of hundreds of thousands of women is borne out by careful scientific tests of Old Dutch, proving conclusively that it is the most economical, safest and most efficient cleanser to use.

There's nothing else like Old Dutch Cleanser. Why? The microscope makes it clear. Notice that the particles of Old Dutch Cleanser are flaky and flat-shaped; that they lie flat on the surface and come in full contact with it whereas grit merely scratches the surface with sharp, hard points. That's why Old Dutch covers more surface, why it is more economical and efficient. It contains no harsh

grit or crude abrasives, no caustic or acids, and is therefore safe. It possesses a natural detergent energy that quickly removes both visible and invisible impurities, and therefore brings healthful cleanliness.

Old Dutch is ideal for every cleansing purpose—kitchen utensils and refrigerators, porcelain and enamel, linoleum and painted woodwork, silverware, china and glass. It's your greatest aid in preserving the health of your family, the spotless beauty of your home, the softness of lovely hands. For these reasons, women all over the country tell us that *Old Dutch is the only cleanser they need in their homes.*

This is the Old Dutch Rubbing Cleansing Sponge. Convenient and practical. A little Old Dutch and this sponge does a quick, thorough cleaning job. An attractive bathroom and kitchen accessory. Jodel for its luster. Most 10¢ and the window pane from an Old Dutch Cleanser label for each sponge.

OLD DUTCH CLEANSER
Dept. 42 44 Macaulay Ave., Toronto, Ontario

Name _____
